

Year 4 Newsletter

Spring 1 2021

This term's topic is.....

Seasons, Climate and Biomes

This is a Geography topic. We will be learning about the Earth's tilt and why we have different seasons. We will also find out about the different climates on Earth and how they relate to the plants and animals that live in different places (Biomes). We will also discuss where our food comes from and why we need to import and export products. This will lead us to learn about food miles and carbon footprints.

In Science we will learn about different animals that live in different parts of the world and how they are adapted to live in their particular climate and Biome. We will also look at endangered species.

Homework

Every night-

- Read with your child
- Times Tables practice
- Spellings practice

- research animals and plants from different countries and create a collage for one of the countries.

- practise telling the time

- use a thermometer to measure indoor and outdoor temperatures- make a chart over time.

- paint snow scenes

- look for plants and insects in your outdoor space or park and try to identify them

Trips and Visits

***No trips allowed
due to COVID 19***

PE

PE is on Wednesday and Friday. Please make sure that your child brings appropriate shoes to school on those days- trainers/pumps
